Dear Maurice

We are pleased to report that the bibliographic data of the above-identified European patent application will be published on May 2, 2007, under Publication Number 1778973. Enclosed for your records is a copy of the Notice of European Publication.

The publication of a European patent application provides a basis for a claim to compensation in the event of infringement by competitors. Countries, however, which do not have English as an official language may reject a claim to compensation unless the claims are filed in the official language of that country.

We do not recommend translations be prepared at this time, unless you have reason to believe an infringement by a competitor is active in any European country in which English is not an official language. If you are aware of any such infringement, please let us know as soon as possible.

If you have any questions, please contact our office. Our invoice is enclosed.

Very truly yours,

Borden Ladner Gervais LLP

#### Notification of European publication number and information on the application of Article 67(3) EPC

The provisional protection under Article 67(1) and (2) EPC in the individual contracting states becomes effective only when the conditions referred to in Article 67(3) EPC have been fulfilled (for further details, see information brochure of the European Patent Office "National Law relating to the EPC" and additional information in the Official Journal of the European Patent Office).

A request has been made for extension of the patent to: AL BA HR MK YU  
See Official Journal 1-2/1994 for further information on provisional protection.

Pursuant to Article 158(1) EPC the publication under Article 21 PCT of an international application for which the European Patent Office is a designated Office takes the place of the publication of a European patent application.

The bibliographic data of the above-mentioned Euro-PCT application will be published on 02.05.07 in Section I.1 of the European Patent Bulletin. The European publication number is 1778973.

In all future communications to the European Patent Office, please quote the application number plus Directorate number.
